SECTION I: OVERVIEW

Summary of Expenditures for Sponsored Research

One of the world's great research institutions, Princeton University seeks to achieve the highest levels of distinction in the discovery and transmission of knowledge and understanding. Conducting cutting-edge research and maintaining an unparalleled commitment to teaching are central to the University's mission.

The health of Princeton's research enterprise is vitally important to the University's success. Its ability to attract a significant amount of external funding both reflects and enhances the exceptional quality of research at Princeton. Such sponsored programs account for about 15% of the University's total operating budget, and sponsored programs represent a significant portion of overall research expenditures at Princeton.

In fiscal year 2025 (July 1, 2024, through June 30, 2025), sponsored research expenditures for Princeton's main campus totaled $338M. The Princeton Plasma Physics Laboratory (PPPL), a U.S. Department of Energy national laboratory for plasma physics, nuclear fusion science, and plasma technologies managed and operated by Princeton, recorded an additional $231M in sponsored research expenditures during the same period. The total of FY2025 sponsored research expenditures for the University and PPPL combined was $568.5M.

Several tables are provided to illustrate current and historical trends in sponsored research for Princeton's main campus and PPPL. Expenditures are described in actual dollars and have not been adjusted for inflation.

Notes on FY2025 Data

(1) All awards with activity during fiscal year 2025 are included in the count of awards.
(2) Tables show expenditures from Prime/Flow-through sources.
(3) The expenditures section shows expenditures by the Project Owning Department.

Additionally, the National Science Foundation's Higher Education Research and Development (HERD) Survey website is a helpful source of research expenditure-related data at research intensive universities across the U.S. (including Princeton), updated annually: ***https://www.nsf.gov/statistics/srvyherd/.*** HERD survey data reflects sponsored research projects, as well as gifts, prizes and institutional funding, spent at Princeton's main campus; it excludes PPPL data.

In this publication, FY2025 refers to the fiscal year as July 1–June 30, which is consistent with the dates used for campus sponsored research expenditures. In other publications, PPPL budget authorization or expenditures may be reported using the U.S. DOE (federal) fiscal year of October 1–September 30.
