Dear Alex and Nate,

Thank you for writing. While the University doesn't publicly disclose details about the holdings of the endowment or its investment strategy except for in rare circumstances when a formal dissociation proceeding reaches a certain level of maturity, we do want to provide members of the community with a sense of the impact of PRINCO's step toward achieving a net-zero endowment portfolio over time. Public fossil fuel companies represented about \$1B of the endowment when we announced the action to eliminate all holdings in publicly traded fossil fuel companies.

I hope this is helpful.

Sincerely,

VP Parker

Subject: Request for Information about Divestment Policy

Dear Vice President Parker,

Nate Howard and I are members of Divest Princeton writing to request clarification about Princeton's fossil fuel holdings. Would you mind providing us with information around how much of Princeton's fossil fuel endowment was invested in privately traded versus publicly traded fossil fuel companies?

Thank you for your time. We look forward to hearing from you.

Sincerely,

Alex Norbrook and Nate Howard, Divest Princeton Co-Coordinator
